

NEIL KEENAN UPDATE | Indonesia At Bat: “Connect The Dots”

<http://neilkeenan.com/neil-keenan-update-indonesia-at-bat-connect-the-dots>

January 22 2016 | Transcript

Video #1

Good morning. It's cold here, as you can see it's been snowing for a couple of days. It's the 18th, I believe, of January. And I'm not too sure on the date, but if it's not the 18th, it's the 19th. So I'm close enough right?

And this is the first snow woman. OK, my Asian buddies wanted me to put up their snow woman, so they could see what a snow woman looked like. This is snow woman that lost a couple of buttons this morning. I put them back on and seashells from Bali. No coal over here. I can't find any coal, no dark eyes. The candy is all I had for eyes last night and the mouth which was candies, so the snow woman, well I compensated for loss of eyes and loss of mouth, teeth by padding the dupa a little bit, the back side, to give a bigger back side. The snow woman looks fine. When she walks, you'll know she's all woman.

Let's get into the show here and into this little thing here. It's freezing out here. You can see it's snowing here for a couple of days. I can make snowballs to hit you with if you were here. I have a good time. We have snowball fights like we used to. And I know somebody who would like to hit me with a snowball.

Anyway, let's get into this bombing in Jakarta. You know just a little while ago we were talking about things somewhat similar to this, where George Soros was financing an insurrection in Indonesia. There was an end put to that by the Indonesian military. We had Bill Clinton's Arkansas foundation funneling the drug money, Columbian drug money into Indonesia, so they could assassinate actually the vice president of the country, so that they could plant their own vice president within--similar to what they've done in Italy with Monti and what they've done in Greece with Papademos. You know it goes on and on what they've done.

And then we've had, most recently we had the World Economic Forum, the very same people who were involved in the theft of my notes, where this all began with Giancarlo Bruno. They were in Indonesia at a meeting conference where they promised and assured Indonesia that they'd give them all kinds of financing for projects in Indonesia, investment projects.

As we already know, once they're in, it's over. They get good seed, it's a poisoned seed and it is spread all over the country really quickly. So you know they were invited in there by the liberal group and other group, I forgot who. But they came out and they are supposedly, allegedly successful. We can stop that when we get settled. Once we get settled, it should be history. It should be history for the cabal in every manner and form.

Now the bombing, this is a new event, similar, another seed they want to plant, as they made it clear they want ISIS all over the world. ISIS is the western baby, they're financing it. It's the Saudi's, it's the US government, if you want to call it government. It's Obama, it's not even government. If you want to call government people, it's Obama. It's him, it's the clown, the king clown, the jester, you know, with the linebacker wife. Anyway, let's--it's sad and it's sick. And it's all happening all throughout the world for the same reason. They are wanting it. And they want to take over if they can. And there's no way possible that they can and that's up to you and yours to decide, not just up to me. It's up to you and yours and everyone else as well. And a few people can't beat them when they've got the might of the US tax dollar and the might of this dollar and that dollar.

The Chinese are trying to ruin them by taking away the dollar and you can't buy the, can't use the dollar that much anymore. The Chinese are going to take them down for using the dollar to create the wars that they created and create the messes that they are creating and the chaos they're creating.

When the dollar is gone, you're all going to cry, because you're not going to have it and you should have thought about what you could have done with that dollar way back when, when we could've taking care of this problem and even save the dollar. Right now you're going to lose the dollar and that's what's going to happen. And it's a shame because it didn't have to be. But the people that could have helped, that should have helped, they're just too damn greedy to begin with. They didn't want help, they thought they could sit there and they could do nothing. Well, they're going to go to their bank and find the dollar worth nothing very soon. You all are. That's going to be your fear, okay because we're not going to have a military, we're not going to have this, and we're not going to have that. We're not going to be able to protect our borders. We're not going to be able to protect anything. We don't have the money. We don't have any gold-backed money. We have regular fiat, regular paper, which has no value whatsoever. And the Chinese just made it very clear, we don't want any of the dollars, dump them, and they're dumping them. They've been dumping them all along. I think everybody's fed up with Obama and his group.

Which brings us to the next step. You know, I'm not trying to scare you. I'm not going to, because we're going to win. We're going to win. I don't talk doom and gloom. I only talk doom and then I bring it back to blossoming and no gloom.

Let's see, the next situation would be the election. If you vote for Hillary, you're a fool. If you vote for the old man, you're a fool. If you vote for Cruz, you're a fool. If you vote for Rubio, you're a fool. Because they're just going to give you more of the same you got and you deserve everything you get and what you're going to get at that point in time, just for being foolish, for being stupid.

Okay, the only person that's out there, that you can vote for right now, and he's right, he's aware. He's a business winner, he's a winner. We don't need a politician in our office because they do not understand business. They do not understand politics. They create their own rules for politics. They create their own rules for destruction. They create their own rules how to destroy you, okay, and how to change the constitution when the constitution cannot be changed by anybody, such as Obama. Okay? You can't change it. You need a lot of people to change it. You don't have them.

So, the person you vote for in this election would be Trump. He's the only one that's standing fast, he's standing strong, he's standing stable. Okay, he's had his ups and downs every now and then, but the bottom line is there is nothing better and he's not afraid. But I'm afraid something might happen to him. But I think he's well aware, that he's watching it too. He's not a fool. He's not like them. They think you're a fool, he doesn't think you're a fool. He's one of us. I know people who grew up with him and he was the same then. Donald Trump. He's going to be our president. If not, then I'll tell you now I won't be allowed to create humanitarian packages inside the U.S. because it'll be taken by the powers that be, and that'll be the names I just mentioned and they're all considered terrorists. All of them, Bernie, all of them. They're all terrorists, they're all ready to terrorize you further. Further, as if you haven't been terrorized enough. They're going to do more.

Drake, you're right. It's time, it's time to stop it Drake. But you need financing too, to stop it and the people with the money, the good people with the money are afraid to put it out there. Instead they're going to just lose it and they're going to be dead. They're going to be dead. So Drake, you've done your best buddy. But you know you can be a magic man sometimes, but you can't be the magic man all of the time.

I'm voting for Trump and if Trump's in, there will be humanitarian packages. He's not classified as a terrorist. As a matter of fact he's sized up as a good guy throughout the world. So that's who you have to vote for, otherwise I don't know how I'm going to be able to slide it through to you, to get yourself back rolling again because they're going to be stealing it as I slide it. You're probably going to

have to leave the country to get out of there to stay safe. And you're not going to have the money to do that either.

Okay, you got Pete Santilli listed as a Fed for God's sake you people. Peter Santilli, he puts his neck on the line every day for you from what I see. And somebody comes up with some phony paper or some paper--I mean I got them filed against me, if you remember. I mean even Jean Haines did that that to me and she was part of my team at that time. They created their own crap. They throw their own crap out there and then they want you to believe that you're going to destroy the very people that are trying to save your backsides. Stop it. Peter Santilli is a good guy. As a matter of fact, I'll bring him over to Indonesia if I have to when the time comes and keep him over there because he's that good. You don't have anything better--him and Drake, David. Benjamin right now, his work is out there. It's there.

So where are we? With the bombing, it's all a western thing. They're planting their seeds just as they're doing in the United States. Indonesia is a very, is a stronghold, not only for Muslims of course, but for the for the assets. And they do not want me releasing them. You're right, Sharon, you're right. That's what it is. It's a message and it's going to be many more messages throughout. But you know something? We're going to get rid of them. Jokowi, the president of Indonesia, is not only humble. He's also strong. He maybe looks small, but he carries a big stick. Jokowi is going to do the right thing. He will.

Nelu is so fervent about completing this. He's trying to get this thing done in Indonesia without me. He went back to the jungle. Pretty soon he is going to be George of the Jungle or Nelu of the Jungle. You know, watch out for the tree. But Nelu is doing his best.

Then you know what you got in New Zealand, you've got them buying up property in New Zealand like you can't believe, that they want the indigenous people out. They want them dead, you know? Richard, who handles our posting for us, Richard is going to be, all of the projects we do in New Zealand will be coming through Richard. As I said from the beginning, they won't come through anyone else. This one guy in particular made mention most recently that I was going to, I promised, or would I promise New Zealand money for some project that I had never heard of. And I didn't answer him. I made it clear, Richard's the guy everything runs through, not me, Richard. You know, this guy created a few problems and I'm tired of the problems that people cause because they're not going to get what they want. I'll kick this guy in his ass.

OK and in the meanwhile somebody did call me and threaten me because of this. and I don't give a shit. I don't care who you are. "You're supposed to be able to do this and you're supposed to be able to do that." Well you know something? You should know when someone next to you is lying to you and I really don't care. We're going to do what we say we're going to do now.

I'm getting tired. We've got to hurry. Time is moving on, it's getting faster and faster. We're getting to the end of this thing. We're close to the end. We could have had it finished by now. And some of it's my fault. I spent my money foolishly in the beginning. But then again in the beginning I didn't know what foolish was. I was after everybody, all at once. It was a blitzkrieg for me, but the thing is, is that I wasn't ready for the blitzkrieg because I really didn't know all the players at that time. I didn't know any and I was very angry that they stole the notes, that Daniele Dal Bosco, from Italia, stole the notes. The reason why you're in the problem you're in today is because of Daniele Dal Bosco, from Italy. Claims that he's a pious man, he's a religious man. Don't let him fool ya. The man's a snake. Stole from his partners, he stole from everyone else. His girl's a pilot on an airline flight, private airline flight for private people with lots of money. This is how her boy, Dal Bosco, is procuring money, by meeting up with them, making deals with them, and then probably stealing from them. So you know I mean there's nothing I can do about that. There's only things you can do. You can make their life difficult or you can make their life hell. Dal Bosco's mine later. You can't hurt him, he's mine.

On the other hand, let's just get back to this world, we're all going to be fine. It's going to be over with soon. I had to tell you about the bombing. I had to tell you about New Zealand, that everything else is bullshit, the threats. Bullshit. We don't have to worry about any of this. We just have to worry about getting it done. OK?

Donald Trump, you're doing a great job, you know, just fantastic job. You're taking down the entire political teams--Democrat, Republican, whatever. You've taken them down by yourself. And that's exactly what had to be done because they're both owned by the same party, by the same people--George Soros and Rothschild. It's over boys, it's over. You finally found a man with courage, finally found a man with the cajones that will fight you back, who had the money to fight you back. You're lost, you have to lose even further. You've got to lose everything soon. And when the dollar goes down, all your money's going down too. You're not going to be able to control anything anymore. That's what's happening. That's what's happening.

They're losing boys and girls, they're losing, but we can make it faster and we can get ourselves in the humanitarian project shortly once we get this moving. OK. I'll find the money as I told you. Bye bye for now. I think he's going to tell me that we're almost done. Yeah? We'll start with the first video, yeah? And I don't want to take you time, I just want you to know everything's okay. And this is Taja, who can't hear you. Those are earmuffs, keep her warm and the buttons, she's got her buttons back, so she has her senses back. She's okay and she's got an extra pad for her backside to keep her warm.

So goodbye. Thank you, I know this is a rush job it seems by me. And I don't know if this is a good post or not. Do you think it's a good post? Yeah? I think that

we just have to get it done--as Drake says, get'r'done. Bye bye to all. I'll talk to you soon. Remember, the explosion was just another false flag. It has everything to do with planting their seeds. The guy who did that also is Indonesian. He also went to Syria and he fought in Syria for ISIS. That's their boys.

So one thing I did not want to forget, and I wanted to make sure that I got to you is the threat made by John Kerry when he visited the president of Indonesia and he requested gold. He wanted gold. When he was told he couldn't have it, soon after he released, made that public release, international release, that the United States isn't one to be messed with because they have the climate control machines where they can create, he didn't say it, but we already know, tsunamis, earthquakes, etc. They've had the earthquakes in Indonesia, they know what the manmade earthquake is like and the tsunamis, well you know all over the world they've had different things now created by the west. And soon enough they're going to be paid back, the Zionists will be paid back.

The Germans that were lost in World War II at the end of the war and nobody heard from them again, well they're controlling our government now. That's what's happening. Now they're Nazi's.

Now let's go further than that, what you must remember is that Kerry threatened to indirectly to sink Indonesia, the largest Muslim population of these sweet, humble, beautiful people who really don't want any trouble, who are kind. They're intelligent. There are many, many good qualities in Indonesian people. But you're going to find some that, like every other place, you've got your good and you've got your bad. But the people there are so warm, so humble. They'd take the shirt of their back for you. They don't need this. They're going to get it because of where they're located and their history, unless we stop it. We're going to get it because of our history and because of really who we are, who we became.

So that is included in the threats or in the chaos, the Kerry threat in regards to the takeover of Indonesia. If you do what the Philippines has done in the past, just give them what they want, you're okay. Like one person said, "kiss their ass." We've been kissing their ass and the Indonesians have not done that. I don't think they're going to, what I want for Indonesia.

I'll see you soon. We'll get this done for the world, not just Indonesia, for the world, not just for the US, for the world. We need to finish it up. I wish you all well and this has been split up in a couple of places here so that I can finish by adding what I forgot. It's freezing out here and I'm going to forget something. So let me go back in and I wish you all well and we're going to win, going to win. Sometimes it looks like it's not that way, but you know I understand the steps that have to be taken and where they are. Baby, it's cold outside.

Video #2

Yes, good evening. We had done a take previous this afternoon, but in such a hurry in trying to get it to you, I left some things out and I don't really like to do that. I was going to add it, do it from here, not from outside. But it's better that I give you as much as I can and then add from the first part.

Okay, let me start again. It's the 19th of January. I wish it was the 18th, it means I'd have another day to go. Okay, let's do this thing here. First of all the bombing in Indonesia--let me sit back. This whole thing sucks because it's so obvious. How many times has the West tried to get one foot, get a foothold in Indonesia? I mean we've had, oh God, in 1955 even, when Indonesia received its independence, when they had to fight with the Dutch and Kennedy gave them the West Papua, John F. Kennedy. And when he did that of course he had a great relationship with Sukarno. But that wasn't to anyone's liking in the West because the oil companies were involved and they lost too when that happened.

So of course when the time came, Kennedy returned home and so on from his meeting with Sukarno, He already had two strikes against him and they took him out two weeks later. It may not be in that order, but it's pretty close to what happened. I mean between the money being made for a new dollar, the taking out of the Federal Reserve, the taking out of the OSS. It just adds up, if you know what I mean. It just all adds up.

And Lyndon Johnson, being the man in the middle. I wouldn't want him in the middle between myself and anybody, because everybody would know what I'm doing. He became president supposedly sworn in even before Kennedy was dead. I don't know, if you look at the tapes you see a whole bunch went on before hand.

So this here is just another event. You went from the Kennedy situation from, oh God, there's just so many, but let's try to bring them back if we can. We had the Kennedy situation, then Sukarno got the house arrest. Luckily he wasn't killed, I guess that wasn't in the cards. Then after that you've got, my goodness, from what I know, you got, let me think. I'm thinking it all through. You've got Kerry most recently a year ago, telling the Indonesian President that if he doesn't give him the gold that Indonesia as being a huge archipelago, could be underground within 30-50 minutes or something similar to that. You had George Soros two years ago an insurrection in the middle of the jungle in an Indonesian village, okay, financing that.

As to George Soros just financing this last episode too, which took place at the City Mall, which by the way isn't an international mall. It's a mall for Indonesian people. The international part of that mall would be Starbucks. It's not what they claimed in the west about this big international mall. Okay? It's an Indonesian Mall. As a matter of fact it's the first mall in Indonesia.

So let's just get out a little further and see if I forgot something here because

maybe I did, because it's been one thing after--oh the Clintons, the Clinton drug money from the Arkansas foundation. That was right over by the Colombian drug lords and ended up in Indonesia and the job was to assassinate the Indonesian Vice-President. If that had happened, then they would have put their own person in, similar to Italy with Monti, similar to the Greece with Papademos, and similar to a lot of places in the world.

Geeze, we even had the Japanese mobilizing for the first time since World War II and that's all because of the assets as well, the Emperor's daughter, who was married to an Indonesian General, flew over to Jakarta. They all wanted the assets.

And you know, by the way, Indonesia, I'm proud of you, the people of Indonesia standing up and be fearless in light of what has transpired. I'm so glad that you're like that, because you're humble, you're kind, you are generous, you are so many good things. And I'm glad that I know you and I met you, no matter what happens to me, to us, whatever. I'm just glad that we've had this opportunity to work together and do the things that have to be done to hopefully get us all over the hump and rid of the vermin that are running our planet.

Now, enough said about that. We all know already it's the West. We knew it when it happened. Oh and the World Economic Forum came in just a year ago in November and met in Shangri-La invited by large Indonesian corporations like Lippo Group, similar to the United States, the corporations are running the show, more so than the government even. But Indonesia the government still has control. But they brought in the World Economic Forum, which if you remember correctly the World Economic Forum are the ones, along with Dal Bosco, Daniele Dal Bosco, the Italian who stole my notes, which created this whole mess to begin with. You know, without the Italian Daniele Dal Bosco there will be no problem right now. Instead we've got a problem and I don't want anybody going after that man because he's mine. When this is over with, he's mine. You can look at him, you can stick him in his fingers if you wanted something, but don't do anything too bad, because he's mine. I've waited a long time.

So now let's go further, okay? After that, what do we have? We have, depends upon which way I want to handle it right now, I mean we've done a lot of work already on other issues on another tape I really don't want to, because I think they're going to splice and they're going to split, and they're going to make mincemeat or mishmash.

But where are we, I mean I'm not too sure where we are. We are still working on this project that we have in Switzerland, which I'm still working on the financing for that. I'm getting a lot of calls, a lot of messages from people asking me where and when. You know? We spent a lot of money doing this and it's not so easy to just keep getting money because I don't like looking. You know, so it will be happening soon, let's just say that, because I have to be back in Indonesia.

The situation in Indonesia is that Nelu has already made his return trip to the jungle. The last time he slept on the ground for two to three weeks. Not too good but we moved much closer as I told you. I hope to get the papers and I hope to get the boxes and that will really kick this off.

In the meanwhile I've got some things stopping me, like I said, with people in Switzerland, two different places, two different deals. If even one of them hits, then I'm off to Indonesia immediately. And that will be the end of the ball game. We'll be opening up the accounts, which is again why this happened in Jakarta the other day. They don't want the accounts open. And they work for the West, remember. Okay? They hope the West will get them. When I say West I mean Zionists, Nazis, the worst types of people that are in our society.

So we can forget all that now, now let's go further and just finish this up. I'm going to make it as short as I can so that you can relax. I'm looking at the election, the presidential election. What we have to see is the only one that's real is Trump. Everybody else has come out as being a phony. I mean Jeb Bush going into a hissy fit. I mean I wouldn't bet against the fact that he is gay because his brother George W. is and his father is a pedophile. I mean it runs in the family. Mom does something wrong too, I understand. I don't know, okay. I mean the whole thing--Obama and the next one, he's just a follow-up to the others and they're putting the little hissies in the seat. I'd like to see a man in the seat. I don't mean Bernie Sanders either, who if he's it, I think half of the society will drop out. If Cruz is in, it's the same problem. If Rubio's in, you get the same problem. I like Spanish. I lived in the Spanish world.

But the only person that can run and be president, the only one. And I don't mean there's two or three. There's no race with Hillary. Hillary's going to end up in jail, okay? Donald Trump--I said it in the beginning, I'm saying it now. I knew people who grew up with this man. This man's been like this his whole life. He's been a fighter. He doesn't back down. He's not going to back down. It's not his style. As he says, he's a winner. I like the way he sees that, he's a winner. And that's what he is and that's what he's going to be. And by being a winner, it's going to make it a lot easier for me to issue the funds through the collateral accounts to the foundations in the United States. Okay, so that we have many things coming.

I mean Indonesia doesn't have a problem receiving anything. Most nations don't have a problem at all. I mean most of them--if I can slide it right through to the foundations and get it done, but with Obama you can forget it, with my name mentioned you can forget it. It has to be Trump. There are no others, there's no choices. You had your choice last time and look what you did. If the same mistake is made again, then you can forget about them because there's no way I can slide them through. They can't come from war, they can't come from casinos or gambling. We need Trump to clean house for us.

Anyway, no Trump--I don't know what to tell ya, it will be really difficult for me to do. Now I believe that we're so close. I think that we're all going to be in a good spot very shortly. The sooner I can get done what I need done in Switzerland, the sooner we're off and running.

I'm tired. Yeah I have sunshine on a cloudy day too, sometimes in Jakarta. Anyway, look, I wish you all well. I want to make this very clear to New Zealand. Richard in New Zealand will be handling the foundation where the money will come through for humanitarian projects, not anyone else. No one spoke to me about any project. No one has been assured by me they're going to get any project in New Zealand and that's not going to happen. It goes through Richard. Okay? So forget about it forget your wawa, because it's not going to fly with me.

I told you in the beginning it goes my way. My way or the highway. I'm the one doing the work and the one spending the money. I don't need you. So, Richard it's up to you what you do. You'll give me the projects as you see them, Richard. Not as they come in. I don't want to see a million projects. Give me a chance to look things over and get these things opened.

I wish you all the best. Taja, the first female snow woman, she's not melting yet. You might see some video of it from the first clip, which was this morning or this afternoon. And it's a pretty good snow woman, you know. She's got a padded back side and all. I put extra snow there. So enjoy your day, your night, your whatever. I'm tired. I wish you well. Take care. Thank you. This thing's going to be spliced up and split. I just wish you all well. Have a good day. Bye bye.

She's fine now. We lost her eyes somewhere over the night. Don't worry, I'll try to find some blues, or in this case brown eyes. It's a brown-eyed snow woman. We're using seashells from Bali. We can't find charcoal over here or coal or anything to put in here. Okay, how did that song go, "baby it's cold outside."

Anyway, bye bye and take care and now you need tequila. Ciao, adios, hasta lawego, hasta maniana and all the others. Take care of yourselves.
