

NEIL KEENAN UPDATE | Those Were The Days

<http://neilkeenan.com/neil-keenan-update-those-were-the-days/>

January 7 2016 | Transcript

Hi, how are you? Happy holidays and thanks for coming. I'm going to sit in my comfortable chair. This is my computer chair. Okay, Merry Christmas, Happy New Year, Happy Holidays people. It seems like it's been a long holiday, a long working holiday.

It seems that just recently that Trump is calling Obama and Clinton a terrorist or the largest terrorist organization on the face of the earth. How dare he? How can he say such a thing, when everyone knows he's so right? He's absolutely correct. We've all know it for a long time. And the media is condemning Trump. Well I'm sure Trump has a bucket-full of information and pictures and written material that substantiates exactly who's who with the Obama's, the Clinton's, the Cheney's, the Bushes. Our country will be spotless if Trump could ever do what he wishes to do. And I pray to God, do you hear that, Pope Francis or non-Pope Francis? I pray to God he has what he claims he has and can do. I hope he makes the effort. Someone has to. Otherwise, take a look at what we're going to be. We'll have a homosexual, pedophilia state. That's what we're going to be whether you like it or not. If you don't like it you will be shot, or hanged. Something will happen. So let's pray for Trump, Donald, I'm with you buddy. I've been with you from the beginning. I know you, I know how you work. You don't take the bull. There is no room for bull in such a matter as us or the United States turning into mush because of a couple of schmucks.

Another thing we have to realize is that they actually have controlled the world—most of the world for a long period of time. They've been using their money, affixing this world in their image. That's where God comes in—in their image. But God wasn't a pedophiliac—they are. That's how I see it.

Now we have been slaves in many a way, but they've given us a good living in America, in the United States by letting us have a middle class. They've actually taken the middle class out of the rest of the world, the third world, and you see what you've got. So we've lived a little better than most, but now the doors are open, the blinders are off.

Maybe we're not drinking their water anymore, maybe we're not brushing our teeth with their toothpaste anymore, maybe we're not eating their canned food anymore. There's a lot of things we're not doing and we're doing it right because we're waking up every day.

Damn, I've been awake for a long time. Isn't it time for me to go to sleep? Are you tired of hearing me? I sure as hell am.

Now soon I have to get back. I have to culminate this whole mess, this off-ledger account matter. And I have to put it in place so we can get the account opened as soon as possible, so that we can get those humanitarian projects on the road. There are many things that have to be done. So please don't tell me what has to be done, I already know. And I can't talk about it either, but I know what has to be done. I know what has to be done throughout the world. Don't think that we've been sitting on our hands.

So anyway, there's so much work to do. There's so many people that have to get involved. We're almost done with the biggest part so far to get to where I am. Many an hour—I don't know how to take a break, I really don't. That's how I am, I'm built like that, whether it's basketball, baseball, football. I have to continue until it's over.

I just had a friend tell me, "no matter what happens, don't worry. You've done more than anybody. Just walk away with your head up when you get about to be judged, you'll walk right in." It reminds me of that song, "Walk right in, sit right down, Mommy let your hair roll down." But no, that's not me. We're going to win it. We're going to get them open. We're going to go to work. We're going to have a beautiful world before I go anywhere. And before my time comes, I'm going to see the beginning or the middle, not the end, because it's just progressing. I'm going to see something beautiful. And I know I'm going to be part of it. That's what makes me feel good.

I want to know that you're safe, your kids are safe, Grandma and Grandpa—I want to know they're safe. It's work and many people don't believe it. Some people are fighting with their families over the holidays, saying this is bullshit. How can it be bullshit if people are dying, there are chemtrails in the sky, vaccines and Monsanto (inaudible) of the world because it's poisonous food. How can it not be real? What does it take for some to wake up?

Then again there are some nations out there, Australia I thought was one, but Abbott himself is saying he's not going to allow them to do this in his country, but Abbott was one of them. New Zealand Prime Minister Keys is another, but he is not opening anything, he wants the doors closed. The Cabal is already buying property there to move in. [additional note from Neil: "New Zealand is planning on making a home for the New World Order and will rid themselves of the indigenous tribes to do so..

They've already purchased quite a bit in Costa Rico and various places in Central America. South America is not budging so much from them so far. The Bushes might have bought the Hitler Estates in Paraguay, but I don't know if they're ever going to have a chance to live there because a critical change took place there.

At one time the president was like them. He was just like them, he was a ruthless killer. Now you've actually got a decent president in there who wants his people to stay alive, wants people to stay alive and he doesn't want murderers living amongst them. In fact there's murderers and drug dealers when they're caught right in the middle of a triangle called a drug triangle. They're the dealers.

So we're going to have a hell of a time, and they're going to have a hell of a time when they have to find a way out—we're going to play hide and seek with them. We're going to let

them hide and we're going to find them. And there's not going to be any "olly, olly, entry" because if we do that and they come out, and they're probably stupid enough to come out, maybe we can do that. I don't know, what do you think?

Anyway, we're going to go back, and when I go back after I do what I have to in Europe, and if I can get it done in Europe, we're sailing. Because right now the financial matter is me, only me. And I'm trying to get the funding to finish this, rather than having to come back when they're holding papers that I need so we can go further. I'll find it, I'll get it. We'll get it done.

Then when we get it done, we'll have a legal team, a security team, and whatever kinds of teams that are needed to set this thing up, to organize it properly, to establish foundations throughout the world. We're not going to give the money to the governments. There are no governments, they're corporations.

It's going to be interesting. I would say a couple of months. Let's just see if I can pull this off. Because everything is difficult here for me. Let's see if I can do it and if I can do it, then we will be okay. If I can't, don't think that way—I don't think that way. So there's no answer to that one. I just wish you all happy holidays and don't worry. We're all, the team, we're all is a few. We're working at putting this thing together and finishing it up and maybe then we can enjoy a holiday of our own making, one where the team and certain people that have done an awful lot to help us—get together somewhere on a beach, maybe in Bali, maybe in the south of France, maybe in Spain, maybe in the Caribbean, maybe who knows where. The bottom line is we're going to have many celebrations after this because we've earned it.

So Santa Claus just said "be good for goodness sake." See, he's coming to town. He already came. I wish you all well. There's not much to say other than I've already been told from Indonesia that there's going to be too much work to do. They don't have any idea how much work there is to do. They have no idea. It's a hundred times more than what they think. And Indonesia is going to become the jewel of southeast Asia. They're going to be a monster. They're going to look so nice. And it's about time that they got the rewards that they've earned. It's about time that they got the rewards that they've earned by holding onto the assets for 100 years.

Anyway, I wish you all a happy new year and a wonderful new year. And I will talk to you soon. I just wanted to get something out to let you know that we're not sitting on our hands and Santa Claus already came to town, not like the song said—unless he's coming back the second time because he forgot something. There's cookies on the table, I'm still waiting. He didn't eat the cookies.

I wish you all well. Just take care. I'll be around the computer. I'll be traveling close and we'll go from there. Thank you very much. Have a great holiday. See you in a week or so and we'll have some further information here. Thank you again. Have a great day and evening and talk to you soon. Take care from Neil and Group K. We wish you a Merry Christmas and a Happy New Year. Thank you all. Bye, thank you for all you've done. We're going to do it for you. Thank you, bye bye.

One more thing I'd like to say is I received a Christmas gift this year unlike anything I ever received. And here it is right here. Can you see it? Hold the camera and just show it or shall

I bring it up? This is a Chi Machine. The chi works the spinal column, it's Asian, and as many of you know it works wonders for your back and lower back and legs into your neck and shoulders. It was given to me for the problem that I had with my feet because of the increase in sugar I had, sudden increase because of some pills that were dropped into something I was eating or drinking. And this is a way to deal with it, one of the ways it helps. And I thought you'd enjoy this because I thought it was crazy.

And my feet started to do some things here, going back and forth. And before you know it my calf and the lower legs were moving back and forth. And all of a sudden the knees got involved, back and forth. Then my hips started going back and forth. Then my lower back, back and forth. And then my here (pointing to waist) down, everything was going back and forth. Then all of a sudden up to here (pointing to mid-chest) started going back and forth. Then it got up to my shoulders, back and forth. Then it was my neck. It was insane. I did it for 15 minutes and when I got off it, I was still going back and forth, but it stopped. And I felt the vibrations in my body. And let me tell you, the Chi Machine, the Chinese chi, it goes through your body and works the frequencies of my brain and it feels good. But it also detected areas where I had pain. It let me know, it showed me. You have a problem here and a problem there. Let's work this thing out. And some of the pain has gone away and in my leg too from the places I had in my leg.

The other thing I need for video is I've had many contacts and calls from other nations other than Indonesia asking me to work with their bunkers, to become part of the inside, which means warehouse bunker. And I'm looking into each and every thing, but first I want to get the letters and I want to do Indonesia. Indonesia could use a break. We have the banks, we have what we need. And we're sure as hell not cabal. I don't ever want to be one of those guys.

Anyway, I just wanted to say bye, bye. I wanted to show you the Chi. We could make a new dance out of this Chi thing. Everybody just wobbling along from head to toe, not knowing what's going on, a zombie walk.

So thank you very much. Enjoy your holiday. And I know some of you people out there right now are saying Neil must have had some tequila. I didn't. I have a lot of work to do. I will be back on the computer talking to various parts of the world, trying to get this thing put to bed, so I can go to bed. I don't get more than 3 or 4 hours sleep a night. I'm getting tired.

You just take care. I wish you the best, okay? Ciao, bye bye.
